

Stage 9 End of unit 5

The tests and mark schemes have been written by the authors. These may not fully reflect the approach of Cambridge Assessment International Education.

Answers

- 1 Show a hexagon divided into 4 triangles.

$$4 \times 180 = 720^\circ \quad [2]$$

- 2 a $6 \times 180 = 1080^\circ$ [2]

- b 135° (allow follow through from incorrect answer to part a) [1]

- 3 $360 - (52 + 55 + 58 + 61 + 64) = 360 - 290 = 70^\circ$ [2]

- 4 a 35° [1]

- b 120° [1]

- 5 $\sqrt{13^2 - 12^2} = 5$ (1 mark for 5 if no method shown) [2]

- 6 $\sqrt{4.5^2 + 7.5^2} = \sqrt{76.5} = 8.7$ or 8.75 m [2]

- 7 a Use of compasses to draw sides seen.

Sides correct to within 2 mm. [2]

- b Use of compasses to construct perpendicular bisector of the 8.5 cm side.

Two parts of line are between 4.2 and 4.3 cm and angle is between 88° and 92° . [2]

- 8 Evidence of construction of 90° , bisection to give 45° and bisection of 45° .

Error less than 2° . [3]

[Total: 20 marks]
