

Stage 9 End of unit 6

The tests and mark schemes have been written by the authors. These may not fully reflect the approach of Cambridge Assessment International Education.

Answers

The answers given here are examples. Usually there are alternative possible answers.

- 1
 - a Gender and estimates of masses of a range of items for each person. [2]
 - b It will enable you to look at ability to estimate heavy and light objects and relate this to gender. [2]
 - c Give each person several objects to estimate the mass. Record gender and results in a table or in a spreadsheet so that they can be processed. [2]

(1 mark for a partial answer in each section)
- 2
 - a People might not know their height and just guess. People might be embarrassed and give an incorrect answer. [1]
 - b People might be wearing shoes with heels, in which case the height recorded will be too large. [1]
 - c You might not make accurate or consistent guesses. [1]
- 3

Method 1: Yes, because longer words are usually harder to read than shorter words. There could be bias if some articles are on a familiar subject and other articles are not.

Method 2: Yes, because longer articles require more concentration. There could be bias if different readers are used because there is a difference between reading speed that is not connected to ability to understand. [4]

(1 mark for a partial answer in each section)
- 4
 - a Women stay longer in the supermarket than men.
Younger people spend more than older people. [2]
 - b Collect data on different days and at different times of day.
Include specific numbers of men and women.
Choose a range of ages of customers. [3]
- 5

Not all customers will reply.

Customers might be more likely to reply if they are dissatisfied. [2]

[Total: 20 marks]
